

Project Profile

Dickinson College
Durden Athletic
Training Center
Carlisle, Pa.

Scope:
Provided full HVAC systems,
including four AAON packaged
rooftop units and special
DuctSox fabric ductwork
for air distribution

*Durden Athletic
Training Center*

Ductwork

AAON rooftop units

Project Spotlight

Dickinson College

Carlisle, Pa.

Durden Athletic Training Center

Thanks to a \$6 million gift from Samuel G. Rose '58 and Julie Walters, a new two-story, 22,000-square-foot athletics-training center replaced the 1960s-era locker rooms at Dickinson's recently renovated Biddle Field. The new facility is named the Durden Athletic Training Center to honor the tenure of President William G. Durden '71 and his wife, Dr. Elke Durden. (Reference: www.dickinson.edu)

CRAFT & Son was selected to provide the heating, ventilating and air conditioning for the project, which included four AAON packaged HVAC rooftop units, 26 variable air volume boxes, unit heaters, ventilation equipment, the automatic temperature controls and all associated piping, valves, fittings, louvers and grilles. Most of the ductwork on the project was fabricated in our sheet metal shop, except some special DuctSox fabric ductwork specified for air distribution in the fitness center.

Fitness Center DuctSox

The project was estimated by Mike Kearns and managed by Jeff Murry. The all-important field supervision and daily coordination was provided by Lee Slagle.
