

Bell & Evans
Fredericksburg, PA

Grand opening and ribbon cutting with Pennsylvania Governor Tom Wolf.

Project Spotlight

Bell & Evans Hatchery

A Better Chicken Dinner Starts at Birth!

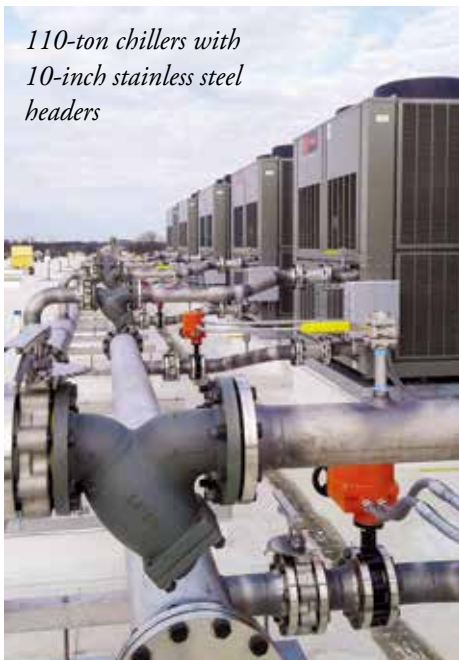

Scope:
Design-build HVAC and
plumbing services for this new
210,000-square-foot
food-grade headquarters

Bell & Evans believes “A better chicken dinner starts at birth!” And, its new facility in Fredericksburg, Pennsylvania shows just how committed the company is to that vision.

What began for us as an underground plumbing project, with a value of just under \$1 million, has evolved into a more than \$7 million dollar project. And, to achieve the targeted completion date of August 1, 2017, we had upwards of 25 people on the project providing our typical “Quality CRAFTsmanship.”

This is an extremely “clean” facility, so much of the system piping on the project was installed in schedule 40 stainless steel, including the 10-inch headers serving the six 110-ton chillers. Our crews also installed high pressure piping to serve 30 high pressure hose

reels, capable of delivering 900 PSI, plus six different chemical systems and air lines to serve the hatch equipment. Other systems under our contract were the domestic water piping and gas piping throughout the impressive structure.
