## Operating Room RTU-C

# WellSpan Apple Hill Medical Center

James CRAFT & Son is not a stranger to WellSpan Health. We have completed a number of projects for what is considered one of the largest regional health systems in Southcentral Pennsylvania. Recently, James CRAFT & Son was contracted to do the following work at WellSpan Apple Hill Medical Center:

- Demo four existing duct heaters and install four new ones serving the existing operating rooms;
- Installation of humidity and temperature sensors along with pressor

sensors in the existing operating rooms;

- Installation of new control wiring to the existing operating rooms;
- Installation of a new rooftop unit (RTU) along with support steel and curb;
- Installation of support utilities for the RTU in the ceiling space below;
- Removal of existing humidifiers;
- Installation and insulation of new rooftop ductwork;
- Patching and painting of portions of the operation room walls where

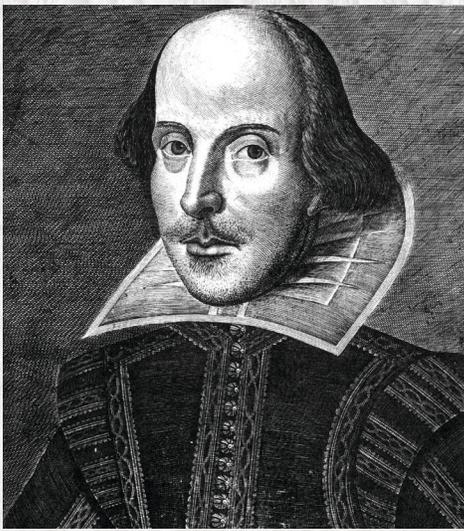

existing controls were removed;

- Removal of the existing RTU-C along with the curb and patching the roof.
- Because the building was occupied, we had from Friday night after surgeries were completed until Sunday afternoon to complete this work. Significant coordination was needed between us, our subcontractors, and the Apple Hill Medical Center staff to ensure a smooth project. Everything ended well due to great teamwork!

# Minimize Workplace Stress With These Four Techniques

Work can be stressful, and too much stress can have a negative impact on your physical and mental health as well as your career. The BioSpace website recommends these tactics for keeping stress under control before it cripples you:

- **Practice meditation.** You don't need an elaborate ritual. Just spend a few minutes every day clearing your mind, focusing on your breathing, and letting your thoughts flow without focusing on any one thing. Meditation can ease depression, high blood pressure, and other side effects of stress.
- **Adjust your work/life balance.** Don't let your job become your whole life. Be sure to take the time off you're entitled to so you can relax and refresh. Leave work behind at the end of the day and focus on your family and friends. No matter how busy you are, devote some time to enjoying life without worrying about what's happening at the office.
- **Get organized.** Stress can result from not managing your time effectively. Set priorities so you know where to focus your energy for the best results. Create a filing/storage system so you don't have to waste time and increase your stress looking for important items. Establish some personal rituals for the day—meditation and a cup of tea in the morning, for example, deep breathing in the afternoon and don't forget to get up and stretch your legs throughout the day.
- **Ask for help.** Don't try to do everything yourself. Be honest about your strengths and gaps, and don't be afraid to ask for assistance when you need it—it's better than making a mistake because you weren't willing to reach out. On a personal level, don't try to handle your stress on your own. A therapist or life coach can offer tips and techniques for managing problems effectively, freeing you up to focus on what you want.

*“People don't buy what you do. They buy why you do it.”*

—Simon Sinek

## Not So Dumb After All

A young boy enters a barber shop, and the barber whispers to his customer, “This is the dumbest kid in the world. Watch while I show you.”

The barber puts a dollar bill in one hand and two quarters in the other, then calls the boy over and asks, “Which do you want, son?”

The boy takes the quarters and leaves.

“What did I tell you?” said the barber. “That kid never learns!”

Later, the customer sees the same young boy coming out of an ice cream parlor. “Hey, son! May I ask you a question? Why did you take the quarters instead of the dollar bill?”

The boy licks his cone and replies: “Because the day I take the dollar, the game is over!”

# Finding Your Sweet Spot

Some people know exactly what they want to do with their lives at an early age. Not author, journalist and motivational speaker, Rebecca Stephens.

The first British woman to summit Mount Everest came to mountaineering in her late 20s, after graduate school and years of working as a journalist.

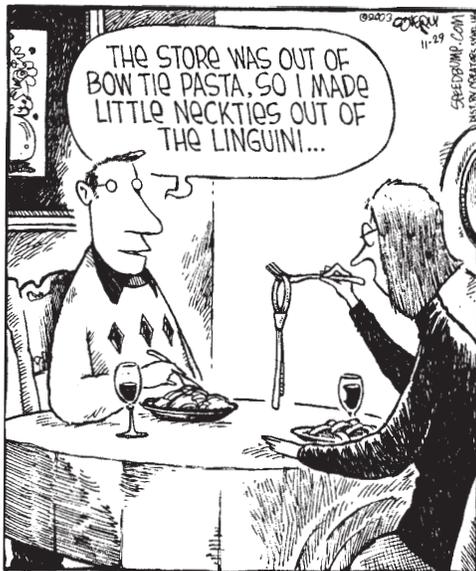

A magazine assigned her to cover an expedition to the Himalayas. There she realized that her true goal in life was to climb to the peak of the highest mountain in the world. So she quit her job and spent years working to fund a climbing expedition. The fear of dedicating herself to such a goal without a job, during a recession, and with a mortgage to pay was daunting, but she didn't let it stop her from pursuing her dream.

Since reaching the peak in 1993, Stephens has gone on to summit the "Seven Sisters," the highest peaks on every continent. Her advice to people still looking for their calling?

"Don't panic. It's okay to explore. It's okay to try different things," she tells the *Insider* website. "It's a question of finding the sweet spot. But quite often if you follow what it is that really fulfills and interests you, the rest falls into place."

# Manage Your Younger Workforce With Care

Today's youngest workers are smart and energetic, but often they have some rough edges that need to be softened. If you're in charge of one or more twentysomethings, follow this advice from the Society for Human Resource Management:

- **Let them fail.** They'll mess up because they don't have experience, but don't lose your temper. Let them know that failure happens and it's not necessarily fatal, as long as they're making a good-faith effort—and as long as they learn from it.
- **Be patient.** Remind yourself that your young workers are just starting out. They don't have the knowledge or experience that you've gained over the years. Keep your expectations realistic, and avoid discouraging them as they're learning.
- **Tailor your training.** Don't try to cram every worker into the same training program, especially younger ones. Assess their experience level. Get a good idea of what they know, and design training that fills in their gaps and reinforces their skills.
- **Take advantage of their strengths.** Find out what they're good at, and start off with assignments that use their talents effectively. They'll gain confidence, you'll look good, and together you can work on expanding their skills so they can advance.
- **Give lots of feedback.** Veteran employees usually know when they're doing a good job and where they need help. Younger employees may not. Keep an eye on them and give them lots of feedback, both positive when they perform well and constructive where they need improvement. When they know you'll hold them accountable, they'll try harder to succeed.
- **Ask for their opinions.** From time to time, ask young employees if your approach to training and management is working for them. They may spot areas you could pay more attention to, or things they want to learn that you've neglected. They'll improve and will realize that you trust their point of view.

*"What I do for my work is exactly what I would do if nobody paid me."*

—Gretchen Rubin

# Putting A Band-Aid On It

The adhesive bandage is commonplace in medicine cabinets and first-aid kits around the world.

It was invented in 1921 by Earle Dickson, an employee of Johnson & Johnson. Dickson was concerned for his wife Josephine, who suffered frequent cuts and burns in the kitchen. They originally tried to wrap Josephine's wounds in gauze and adhesive tape, but the dressing usually fell off in a short time. Dickson tried placing some gauze in the center of a piece of tape, and covering the whole thing with crinoline to keep it sterile.

The invention worked so well for his wife that Dickson took some to work to show to his colleagues. The company owner, James Johnson, caught wind of the idea, asked for a demonstration, and ultimately decided the company should manufacture them. Dickson went on to have a successful career at Johnson & Johnson, becoming vice president before his retirement in 1957.

## Welcome Ally Stevens!

James CRAFT & Son is pleased to announce that Allyson Stevens is our newest Payroll and Accounts Billable Administrator.

Ally earned her undergraduate degree in Human Resource Management in 2014, and completed her MBA through Southern New Hampshire University in 2018. She previously worked as an office manager at a construction company and a practice manager for an orthodontist.

Ally lives in Southern York County on the outskirts of Lake Redman with her husband and three daughters. You can usually find Ally by the grill, in the pool, or sitting near an evening bonfire with her kiddos and her Great Dane.

A safe working environment is vitally important, both for the welfare of our employees and the good of the company. For us, safety is not only a legal requirement, but a moral responsibility. We designed our safety program to enlist the full participation of all of our employees and associates to remove hazards from the work place, prevent accidents and to promote job site safety so everyone goes home safely at night.
