Project Profile

Bethany United Methodist Church

System Upgrades Result in Energy Savings and Increased Comfort

One of the most beautiful church facilities in the area, Bethany United Methodist Church in Red Lion, Pa., entrusted the upgrade of its heating system to James CRAFT & Son, Inc. A high-efficiency heating system replaced old, outdated equipment, and air conditioning was added.

This challenging upgrade project required design/build expertise and professional sizing and layout. Our design team, led by Fred Craft and including Steve Ferree, worked tirelessly on project planning, while our field staff, led by Dave Arndt and Don Henderson, with oversight by Eric Miller, coordinated all the demolition and installation work.

Now, nearly two years later, the church reports only a \$1,000 increase in annual energy costs (gas and electric) for the facility. This equates to less than \$100 per month to add air conditioning to their wonderful facility!

Chiller.
