Upgrade HVAC systems
in the original
science building

Kline Hall of Science

The classroom used for attic access.

The attic air handler.

Project Profile

Messiah College

Grantham, Pennsylvania - Kline Hall HVAC Upgrades

On the beautiful campus of Messiah College sits Kline Hall, the institution's science learning facility. Following a recent building expansion, James CRAFT & Son performed an upgrade of the HVAC systems in the original section of the structure.

According to Russ Ehrich, campus project manager, the students and staff have been delighted with the increased comfort provided by four new air handlers and associated ductwork and piping. One significant challenge the job posed was access to the attic spaces above the second floor classrooms and offices. By completely removing the ceiling of a large class room and taking the necessary materials up in sections, our crews were able to overcome this obstacle and provide the "Quality CRAFTsmanship" our clients have come to expect from us.

The basement air handler.
