

Project Profile

Cooling Tower
Set In Place

Cooling Tower With
Finished Piping

Insulated Piping and
Electrical Disconnects

Cooling Tower Being
Lifted by Crane

The GIANT Center
Hershey, PA

Scope:

Cooling tower replacement including removal of old tower and piping; and installation of the new tower, vibration isolators, pipe supports, piping with heat trace electrical lines, and insulation

Hershey, PA - Cooling Tower Replacement

The GIANT Center

After being awarded this project, we had to wait several months while the Hershey Bears Hockey Team finished their season, which stretched deep into the playoffs. But, once the schedule was clear and we were released to start, the project moved quickly.

With only one week to complete the job, our team needed several days to unhook and demolish the old cooling tower, removing all the old filter media, piping and the tower itself. The new cooling tower was then brought in by tractor trailer and craned in place—after which new vibration isolators and pipe supports were installed, followed by all the piping with heat trace electrical lines (to prevent freezing in winter), and finally wrapped with insulation.
